# StoCast Brick

## Resin Cast Bricks

Facades

Interiors

StoCast Brick are custom-made resin cast bricks that create unique designs. Achieve the authentic look of brick in any color and texture you desire. Lightweight, flexible, easy to apply and durable, StoCast Brick can be used in Sto engineered wall cladding systems.

# Flexible, lightweight, sustainable and durable: the perfect combination for functional and decorative facade design

StoCast Brick is a highly customizable and versatile facade aesthetic that can be used in a variety of wall systems, ceilings and soffits in both new and existing constructions.

Whether designing a building using a ventilated rainscreen, EIFS and/or stucco system, StoCast Brick is the ideal solution when the project calls for either a traditional or customized “classic” brick look. The product is easily applied at the job site, but is also suitable for use in offsite construction, serving as a finishing component in the creation of manufactured pre-fabricated panels such as those from Sto Panel Technology®. StoCast Brick is ideal for renovation; colors and surface textures can be matched to existing facade designs or used to realize individual creative concepts.

StoCast Brick uses the same technology as Sto's traditional acrylic finishes and therefore allows for nearly endless possibilities for customized designs. By using StoCast Brick together with StoTherm® ci, it is possible to combine continuous thermal insulation with the appearance of a traditional brick facade and add design accents to any building.

**StoCast Brick at a glance**

- Beautiful natural brick appearance
- Proven performance with over 20 years of project use
- Project-specific colors, patterns and textures

# Transform any facade with StoCast Brick

## The beauty of brick in a more sustainable product

StoCast Brick offers the beauty of traditional brick while integrating functional advantages in terms of sustainability. Being thinner and more lightweight than traditional brick, they significantly reduce energy used in manufacturing and transportation, reducing waste and allowing for greater conservation of natural resources.

Bonding instead of bricklaying: the extremely lightweight StoCast Brick units are not laid like bricks, but are instead bonded to the substrate. This opens up a diverse range of design options, from recreating the appearance of brickwork to originating unique artistic designs. This versatile and highly expressive building material is compelling because of its natural characteristics and timeless appeal.

Using Sto's various engineered wall systems behind the cladding(s) will ensure the compatibility and continuity of all the building envelope's control layers (such as air/water/vapor/thermal) without any limit to the aesthetics of the structure.

1. Sto Bonding & Pointing Mortar  
2. StoCast Brick

**Traditional Brick**

- 15 trucks = 60k+ ft²
- L/600-L/720
- Brick style availability based on geography

**StoCast Brick**

- 1 truck = 60k+ ft²
- L/240-L/360
- No geographical limitation

**>90% mineralic**

**Up to 140° F drying**

**Lightweight**

**Benefits at a glance**

- Lightweight
- Flexible
- Minimal maintenance
- Greatly reduces the risk of efflorescence
- Seamless facade design
- Sustainable
- Easy to install
- Precision fit using lintel and corner shapes
- Expert advice on color designs and overall concepts from Sto Studio
- Nearly unlimited choice of colors, textures and formats with special orders upon request

**Sto Bonding & Pointing Mortar**  
A 100% acrylic-based mortar that greatly reduces the risk of effloresce. Available in nine standard colors.

White 2056   Anthracite 2057   Cement-grey 2058   Light grey 2059  
Grey 2060   Graphite 2061   Sand yellow 2062   Brown-grey 2063  
Brown 2064

! A Sto Bonding & Pointing Mortar grout kit is available for more accurate color representation.

# Wide range of looks and design options

## StoCast Brick colors at a glance

With 30 standard bricks and our custom matching abilities, our large selection of StoCast Brick works with any building style. Whether the design calls for a modern, traditional or rustic design, StoCast Brick is both classic and contemporary.

## Reference project: Various sizes and patterns for a unique lightweight brick look

These new homes at Groene Linten, Haarlem, NL demonstrate how a traditional brick finish can be achieved using improved modern technologies. Easily installed and custom designed, the architects were able to design the homes with the look they had in mind and easily achieve unique decorative patterns on the walls. Lightweight and flexible, with virtually no limits on colors, StoCast Brick is ideal to design one-of-a-kind projects.

Combined with the StoTherm® ci system, these homes offer not only a beautiful aesthetic but also low utility bills thanks to the exterior continuous insulation.
